1 Color coded neck binding

The neckline on **DMK KOLDING** surgical gowns is color coded, white indicates Standard gowns, Yellow indicates Reinforced gowns, Green indicates High Performance gowns with AR6-8 Treated material(water, bacteria, fluid, alcohol repellent and anti-static) ,which guide wearers to choose the right gowns for themselves.

- Standard gowns*
- Reinforced gowns*
- High Performance gowns with AR6-8 treated*

2 Raglan sleeve for more comfort

Raglan sleeve gives more space at the shoulder , and provides a better fit, and makes the wearer more flexible and agile.

3 Cotton Knitted Cuff

Our latex-free cotton knitted cuff not only provides comfort to your wrist, but also keeps the gloves tight and safe on surgeon's hand. With length at least 3inches.

4 Ultrasonic welding on critical parts for excellent protection

The technology of ultrasonic welding makes the jointing part seamless and faultless, which forms ultimate barrier to fluid and bacteria. Comparing with traditional sewing stitches, ultrasonic welding makes the gown more protective and stronger.

5 The 5th generation SMMMS fabric

Our SMS technology utilizes five layers of fabric to provide a high level of fluid repellency. This helps provide a barrier to blood, body fluids and pathogens, the fabric features three densely-packed meltblown layers sandwiched between two strong spunbond outer layers.

Strategic raw material supplier PGI, Ahlstrom, SAAF

6 Low-linting

Mesplus gowns are very low linting , minimizing the risk of introducing particles into the O.R

SMMMS Standard Surgical Gown

Disposable standard gowns made of a fluid-repellent nonwoven fabric with a micro-fibre middle layer, with high resistance to penetration by fluids and bacteria, abrasion-resistant and low-linting. Functional medical folding of the gown ensures safe handling under sterile conditions. With high quality material, generous cut and exquisite craft work, our surgical gowns give you strong protection and super comfort.

SMMMS Reinforced Surgical Gown

Reinforced gowns are made from 5-layer polypropylene materials with anti-static and fluid resistance. Three layers of spunbond polypropylene ensure an extraordinary flexibility and breathability, and two layers of meltblown polypropylene form an efficient barrier against bacteria. The critical zones including arm and chest areas are protected by fabric reinforcement with an additional strong and breathable SMMMS. The seams on the sleeves are ultrasonic sealed to avoid fluid penetration through pin holes. Functional medical folding of the gown ensures safe handling under sterile conditions. There are SMS, PP+PE and impregnated paper reinforcement pad available. With our great and exquisite craftwork, the reinforced gowns will give your maximum protection.

* All 3 kinds of Reinforcement pads can be applicable for reinforced surgical gowns

High Performance Surgical Gown

DMK KOLDING High Performance Surgical Gown offers a high level of protection while providing increased breathability and comfort. The fabric is based on SAAF B50B172 and B45B172 made from 5-layer polypropylene materials with Alcohol Repellency, Blood repellent, anti-static and fluid resistance. Three layers of spunbond polypropylene ensure an extraordinary flexibility and breathability, and two layers of meltblown polypropylene form an efficient barrier against bacteria. The critical zones including arm and chest areas are protected by fabric reinforcement with an additional strong and breathable SMMMS. The seams on the sleeves are ultrasonic sealed to avoid fluid penetration through pin holes. Functional medical folding of the gown ensures safe handling under sterile conditions. There are SMS, PP+PE and impregnated paper pad available, with our great and exquisite craftwork, the reinforced gowns will give your maximum protection. Meets ASTM test for viral penetration (ASTM F1671) and ASTM test for blood penetration (ASTM F1670)

Spunlace Surgical Gown

Softa™ Spunlace gowns are made from super soft spunlace fabric with pure cotton feeling, which gives complete comfort to the wearer as well as generous care and perfect protection. It's a great alternative to pure cotton gowns. Spunlace is also anti-static and fluid resistant, a great shield to bacteria. With our generous cut, exquisite craftwork and functional medical folding, it's a great experience to wearing it.

Guide to Protective Descriptions

To eliminate confusion, here's a brief description of the main materials we use in the construction of DMK Kolding protective apparel. Refer back to this page as you look through the brochure.

Spunbond Polypropylene

The standard fabric for basic protective apparel; formed by bonding fibers together to form a single layer of breathable, woven-like material. Its main advantages are economy and comfort, but it also provides light fluid protection.

A multi-ply material consisting of layers of meltblown polypropylene between layers of spunbond polypropylene. Strong, fluid-resistant and breathable, this multi-layer material provides an optimal mix of protection and comfort. Appropriate for extended wear situations involving low to moderate fluid contact.

Coated Polypropylene

Created when soft, spunbond polypropylene is coated with a layer of impervious polyethylene. This lightweight material is ideal for any situation demanding a high level of fluid protection.

Breathable Laminate

Microporous film bonded to nonwoven material provides fluid-proof protection and great breathability. This material is ideal for extended wear conditions where fluid contact is expected.

Levels of Barrier Protection

The **DMK KOLDING** Isolation Gowns with color-coded neck binding meet the test requirements set forth by Association for the Advancement of Medical Instrumentation(AAMI)PB70.

The Chart below is set forth in the AAMI PB70 guidelines. The color-coding has been developed by Medplus to differentiate each level and corresponds with the color-coded neck bindings on the Medplus AAMI Compliant Isolation Gowns.

ANSI/AAMI PB70 Barrier Performance	Test Method	Test Definition	Requirement
Level 1	Water Resistance: Impact Penetration AATCC 42	AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact.	Water Impact \leq 4.5 g
Level 2	Water Resistance: Impact Penetration AATCC 42 Water Resistance: Hydrostatic Pressure AATCC 127	AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact. AATCC 127 Measures the resistance of fabrics to the liquid penetration of water by impact under constant and increasing hydrostatic pressure.	Spray Impact \leq 1.0 g Hydrostatic Pressure \geq 20 cm
Level 3	Water Resistance: Impact Penetration AATCC 42 Water Resistance: Hydrostatic Pressure AATCC 127	AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact. AATCC 127 Measures the resistance of fabrics to the liquid penetration of water by impact under constant and increasing hydrostatic pressure.	Spray Impact \leq 1.0 g Hydrostatic Pressure \geq 50 cm
Level 4	Viral Penetration ASTM F1671	ASTM F1671 Measures the resistance of fabrics to bloodborne pathogens using viral penetration at 2psi and ambient pressure.	Total Impervious

Standard Coverall

Standard coveralls are made with spunbonded polypropylene or SMS. Elastic Hood, cuff, waist, leg and boot allow unrestricted work performance and make it easier to put on over work clothes. The light weight coverall is breathable and enable the wearer to keep cool while wearing. The general size design provides for exceptional comfort and shields against non-hazardous dirt, dust, grime and paints. This is widely used in Medical, Industrial, or housing fields. It's widely used in the areas of Paint Spray, Insulation laying, Pharmaceutical manufacture, food processing, low level chemical handling and cleanups, and Metal processing ,etc.

Type5/6 Coverall

Type 5/6 coverall is guaranteed to fit better and not limit job performance, and excellent barrier against dry particulates and liquid chemical splash. By offering an increased range of movement without compromising the safety element of the coverall users agree this is one of the best garments available. The Lightweight construction offers increased protection due to the Microporous polyethylene film that is applied. With elastic at hood, legs, cuffs and waist, along with a two-way front zip and sealable front flap complete this excellent product. And the protective overshoes are designed for use in all work environments where shoes or floors need protecting. Elastic finish to top of the shoe ensures a secure fit. It's widely used in Pharmaceutical area, Industrial fields and Food Industry.

FFP Respirator

Filter layer after static treatment can filtrate and absorb extremely small harmful industrial powder effectively to prevent anthracosilicosis. Its adjustable nose clip makes the mask closer to the face so that powder cannot leak in. The elastic cords made of Lycra sewn by means of ultrasonic welding can protect those who wear the mask more effectively. It's compliant to the requirements of European Community Directive: 89/686 (articles 11.B) and European Standard EN 149:2001. Totally Latex and PVC free

SCCPE	CPE shoe cover	Blue	Universal	10pcs/roll,10rolls/bag,20bags/case

Disposable gloves are used in food, industrial, light chemical, dental and medical applications. Superior's disposable gloves are available in polyethylene, vinyl, and nitrile. They are also available in varying thicknesses (measured in millimeters) from 3 mil to 15 mil depending on the touch sensitivity or durability required.

Plastic Disposables are made from light weight plastic such as HDPE, Low Density Polyethylene (LDPE), CPE and is widely used in Food Service, Hygiene, Hospital and House Hold

Examination Glove Guideline

Composition

In general, exam gloves will be made from latex, vinyl, nitrile, or a combination of the materials. Our gloves are made with advanced Latex-free formulation, so they are latex-free and not causing any allergic reaction to the wearer.

The cost of gloves will vary based on efficiency of factories and the cost of production and raw materials. The different costs among latex, vinyl, and nitrile is primarily due to the differential seen in the price of raw material. The manufacturing process is nearly identical for all exam glove types.

Powder vs Powder-Free

Nearly all gloves produced today are powder-free. Powdered gloves are generally cheaper than their powder-free counterparts because additional steps are required in the manufacturing process to make the glove powder-free.

Color

Exam gloves can be found in numerous colors like blue, purple, green, or black in addition to the traditional white. In general, you will find nitrile exam gloves to be purple or blue while vinyl gloves remain a white hue. It is important to note that the color of an exam glove does not determine the material composition nor a safety level.

Texture

Another key physical characteristic of medical gloves is texture. Textured gloves are typically preferable to prevent slippage especially when handling moist or wet objects. Textured gloves are typically found either on the fingertips or completely (all over the glove). In general, vinyl gloves are not textured because the raw material (PVC) does not make manufacturing textured gloves easy. Textured versions of gloves can be found in Latex or Nitrile gloves. Today, you will find more textured gloves as these are generally preferred over their smooth counterparts.

Thickness

Arguably the most important glove property will be the thickness of the glove. Thickness is measured typically in millimeters, or "mils". The thickness of gloves may differ throughout the glove, but the most important areas to look are the fingers and palm. Thickness will typically determine the level of protection against chemical agents; however, just because a glove is thick does not mean the glove will provide adequate protection. Glove manufacturers can provide chemical test data so you can select the best glove for your needs.

Examination Vinyl Exam Glove

Made with 100% poly vinyl chloride (PVC), with advance Latex-free formulation, which does not cause any allergic reaction. It's lightly powdered or PU coating for easy donning, and ambidextrous, beaded cuff and smooth external finish give comfortable feeling easy wearing for both hands. It's also 100% DOP/DEHP free. Non-sterile, for examination use only.

Ref.No.	Description	Color	Size	Packaging
VG101	Pre-powdered	Clear	S-XXL	100pcs/box, 1000pcs/case
VG102	Powder Free	Clear	S-XXL	100pcs/box, 1000pcs/case

Latex-free Exam Glove

Made with ultra stretch vinyl synthetic, with advance Latex-free formulation, which does not cause any allergic reaction. It's lightly powdered or PU coating for easy donning, and ambidextrous, beaded cuff and smooth external finish give comfortable feeling easy wearing for both hands. It's also 100% DOP/DEHP free. Non-sterile, for examination use only.

Ref.No.	Description	Color	Size	Packaging
VG103	Powder Free	Yellow/White	S-XXL	100pcs/box, 1000pcs/case

Nitrile Exam Glove

Made with 100% nitrile (Acrylonitrile-butadiene), with advance Latex-free formulation, which does not cause any allergic reaction. It has extraordinary strength and puncture resistance while maintaining tactile sensitivity. with advance Latex-free formulation, which does not cause any allergic reaction

Ref.No.	Description	Color	Size	Packaging
NG101	4mil Pre-powdered	Blue	S-XXL	100pcs/box, 1000pcs/case
NG102	4mil Powdered Free	Blue	S-XXL	100pcs/box, 1000pcs/case

Plastic Glove

Made from premium quality polyethylene (HDPE, LDPE or CPE). It contains no natural rubber latex. It's powder free and, with smooth or embossed surface available.

Ref.No.	Description	Color	Size	Packaging
PG101	PE Smooth	Clear	Universal	100pcs/bag, 100bags/case
PG102	PE Embossed	Clear	Universal	100pcs/bag, 100bags/case
PG103	PE Smooth	Clear and blue	Universal	100pcs/bag, 100bags/case
PG104	PE Embossed	Clear and blue	Universal	100pcs/bag, 100bags/case

PE GOWN

Made from blue polyethylene material, which provides high-level fluid protection. Its apron-style neck enables gowns to be put on or take off quickly and easily. With its specially designed thumb loop style, it prevents sleeves from sliding up when putting on gloves. The gowns are specially folded and packaged in individual pouches in a dispenser box.

Ref.No.	Description	Color	Size	Packaging
PEG101	PE	Blue	Universal	15 per box, 75 per case

PE Apron

Made from a mixture of 65% Low Density Polyethylene (LDPE) and 35% Linear Low Density Polyethylene (LLDPE), which makes it own excellent resistance to chemical corrosion and effective against dirt, moisture and oil.

Length 120 or 140 cm, Width 80cm Regular thickness: 0.018mm, 0.02mm, 0.025mm

Ref.No.	Description	Color	Size	Packaging
PAP101	Smooth	Clear/Blue	Universal	100pcs/bag, 20bags/case
PAP102	Embossed	Clear/Blue	Universal	100pcs/bag, 20bags/case

PE OverSleeve

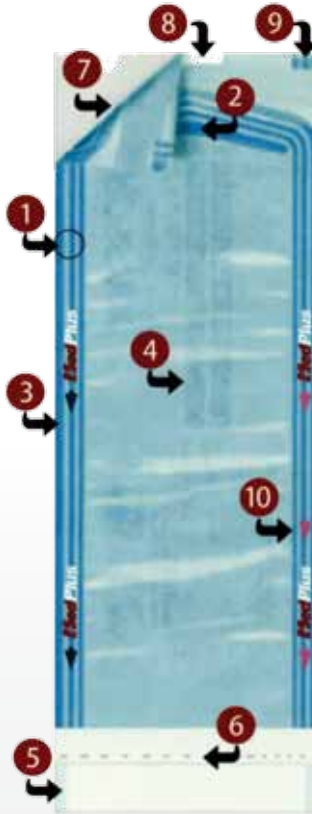

Made from Polyethylene material, which provides waterproof protection for light duty. It's very economical for wet or dry areas in food processing, pharmaceutical and medical industries.

OS101	PE Smooth	Clear/Blue	Universal	100pcs/bag, 20bags/case
OS102	Embossed	Clear/Blue	Universal	100pcs/bag, 20bags/case

Our sterilization packaging series products are manufactured in a Class 100,000 Clean Room facility on unique, high speed, fully validated plant. With our premier technology in this field and strict cost control, our sterilization packaging series products are widely used worldwide.

Sterilization Pouches

- 1 Triple Seal/triple Heat Processed
Three separate heat sealed rails secure edges from separation or tearing by instruments. Seals are heated and cooled three times for ultimate strength.
- 2 Secure Seal
Extra wide chevron seal protects against instrument breaching.
- 3 Medical Grade Paper
Wet strength treated, virgin medical grade paper that meets or exceeds medical pouch standards.
- 4 Blue Tinted transparent film
Facilitates both easy instrument viewing and identification of punctures or tears in film.
- 5 Wide Self-seal adhesive strip
Easily and securely seals pouch, providing reliable seal until pouch is opened.

- 6 Perforated fold
Facilitates easy, accurate folding of adhesive strip to form airtight seal until pouch is opened
- 7 Complete Paper-film separation
Consistently clean separation (peeling) of paper and film is due to high grade materials and adhesives.
- 8 Thumb notch
Assures easy opening of pouch
- 9 Six Corner tack seals
Prevents corners from curling after sterilization. Tacks resist collection of dust and contaminants near seal
- 10 Process indicator arrows
Arrows change color with sterilization heat, are easily visible and are compatible with steam (arrows turn light brown) and ETO (arrow turn dark brown) sterilization agents.

Paper/Film Rolls & Pouches

- 1 See-through film/medical paper, for easy identification of contents, with 60&70gsm medical grade paper.
- 2 Film available for higher-temperature steam sterilization.
- 3 Multi-sealing lines to reduce fiber lift. And minimize risk of sealing-integrity-damage, while loading, stocking and transportation.
- 4 Pouches with chevron seal & notch/finger lift for easy opening.
- 5 Non-tearing film, a superior film for avoid tearing at any opening speed or conditions. Supplied with standard & non-tearing film, according to customer's need.
- 6 Free-polluted printing, printing are placed at sealing-areas, with water-based ink, free of pollution on packed items. Supplied with standard & free-polluted printing, according to customer's need.

Heat Seal Roll (Flat)

Manufactured from tinted heat sealable PET/PP film, 3 side sealed with a ribbed pattern to medical grade paper incorporating Steam and ETO indicators. Its wet strength treated virgin medical grade paper that meets or exceeds medical pouch standards. It provides breathability, sterile barrier, and indication of processing. It is suitable for packaging extra long products or creating individual pouches of special length.

Sterilization Crepe Paper

Manufactured from environmentally friendly cellulose material made from wood pulp, NOT petroleum. It eliminates skin sensitivity issues comparing with plastic based wrappers which have oil residues inherent inside. It creates bacterial barrier to both airborne and waterborne contamination. It has outstanding liquid repellency to water, alcohol, iodine and exceptional Tensile Strength - wet or dry. Use with ETO, steam, gamma irradiation or E-Beam sterilization methods, even texture to permit immediate visual detection of small pinholes/tears.

Description:
 Capacity: 500ml, 750ml
 Transparent foil or White foil
 Pull and Push valve, Twist Valve or Cross Valve
 tube O.D.6.4mm, length 30cm
 Adapter with cap, Anti-Reflux Valve

Description:
 Capacity: 500ml
 White foil, Twist Valve
 tube O.D.6.4mm, length 5cm
 Adapter with cap, Anti-Reflux Valve
 With Latex Straps

Description:
 Capacity: 750ml
 White foil, Cross Valve
 tube O.D.6.4mm, length 30cm
 Adapter with cap, Anti-Reflux Valve
 With Latex Straps

Description:
 Capacity: 900ml
 White foil, Cross Valve
 tube O.D.6.4mm, length 30cm
 Adapter with cap, Anti-Reflux Valve
 With Latex Straps

Description:
 Capacity: 1000ml
 White foil, Twist Valve
 tube O.D.6.4mm, length 5cm
 Adapter with cap, Anti-Reflux Valve
 With Latex Straps

Description:
 Capacity: 500ml Three-Chamber
 White foil, Twist Valve
 tube O.D.7mm, length 45cm
 Adapter with cap, Anti-Reflux Valve

Description:

Capacity: 500ml Three-Chamber
 White foil, T-Tap Outlet Valve
 tube O.D.7mm, length 45cm
 Adapter with cap, Anti-Reflux Valve

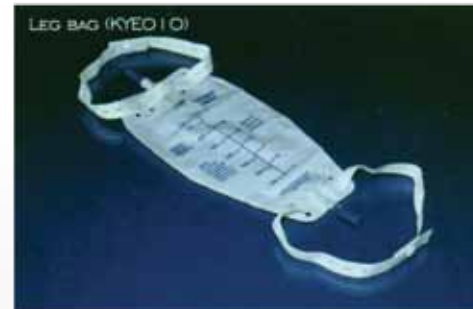

Description:

Capacity: 500ml Three-Chamber
 White foil, Flip Outlet Valve
 tube O.D.7mm, length 30cm
 Needleless Sampling Port Adapter with cap,
 Anti-Reflux Valve

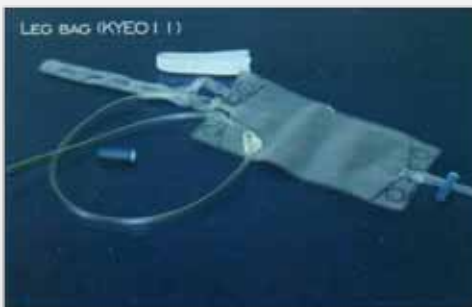

Description:

Capacity: 750ml Three-Chamber
 White foil, Flip Outlet Valve
 tube O.D.7mm, length 45cm
 Adapter with cap, Anti-Reflux Valve
 Anti-Reflux Valve

Description:

Capacity: 750ml
 White foil, Flip Outlet Valve
 tube O.D.0.65mm, length 5cm
 Adapter with cap, Anti-Reflux Valve

Description:

Capacity: 800ml
 White foil, T-Tap Outlet Valve
 tube O.D.6.8mm, length 90cm
 Adapter with cap, Anti-Reflux Valve
 With Latex Straps, With Tube Clamp

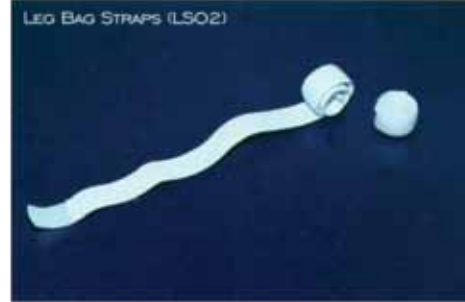

Description:

Capacity: 500ml Three-Chamber
 White foil, Flip Outlet Valve
 tube O.D.7mm, length 45cm
 Adapter with cap, Anti-Reflux Valve

Description:
Latex Free Leg Bag Straps
Length: 50cm x 2.5cm
Color: White

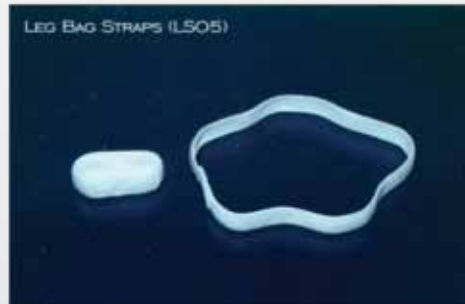

Description:
Latex Silicone Elastic Strap with Magic Verlco
Length: 50cm x 2.5cm
Color: White

Description:
Smaller Latex Free Leg Bag Straps
Material: Nylon, Silicone, Elastic

Y connector with luer lock cap

Description:

These sterile kits are Ideal for self-catheterization training or for when disposal of urine is not readily available, It is designed to have all the necessary components packaged in one user friendly system

FCTO1 Component

- 1 Foley Catheter, 14Fr
- 1 Urinary Drainage Bag with Anti-reflux Drip Chamber
- 1 Pre-filled 10ml Syringe of Sterile Water
- 2 Dry Swabs
- 1 Vinyl Powder-free Gloves
- 1 Waterproof drape, Under pad
- 1 Fenestrated Drape
- 1 Lubricating Jelly, 5g/Packing, Water Soluble
- 3 Povidone-Iodine Swab sticks, 3 Pieces/Packing
- 1 Specimen Container, 40z
- 1 Patient Label

Description:

Usually we will use the URO SYSTEM with the Silicone Catheter which is for leading urine during the operation.

- CA102 Component
- 1 Salver
- 2 Gauzes 3cm x 3cm
- 1 Box of the gaze balls
- 6 Gauze balls
- 1 Blue butadiene-arylonitrile gloves
- 1 Prefilled syringe with 10% glycerin and 90% distilled water
- 1 Empty syringe
- 1 PVC forcep
- 1 Waterproof towel paper 60x60cm
- 1 white garbage bag 25x32cm

Description:

Sterilized with ethylene oxide
 • Package: single use only
 blister & polybag is available

No.	large	middle	small
Size (mm)	35	30	25

Description:

Catheterization Operation Set
 Usually we will use the URO SYSTEM with the Silicone Catheter, which is for leading urine during the operation.

- CA103 Component
- 1 Salve
- 1 Gauze
- 3 Gauze balls
- 1 PVC gloves
- 1 Prefilled syringes with 0% Glycerin and 90% Distilled water
- 2 PVC forceps
- 1 Waterproof towel paper

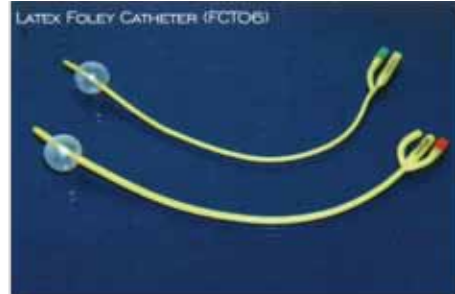

Description:
 100% silicone Foley Catheter minimizes tissue irritation during long periods of indwelling use a firm tip aids with insertion. Large catheter eyes aid in maximum drainage. and strong balloons for added reliability. Color-coded inflation valve accepts luer lock and luer slip syringes

 Drainable outlet
 Cut Size: 10- 45mm, 60mm, 70mm

Description: Hydrocolloids
 Help provide a moist wound environment and protect the wound from cooling and bacteria. Balanced, skin friendly hydrocolloid adhesive offers maximum wear time. yet gentle removal. Latex Free. (Sterile)

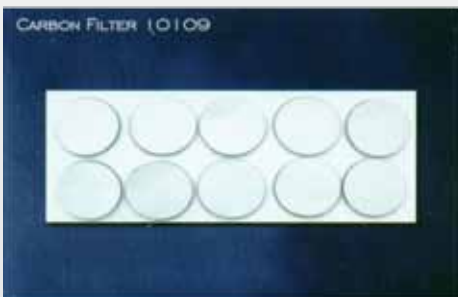

Description:
 Ostomy power 25G
 1. Protect the skin around the stoma
 2. Reduce the stimulation of ecreta
 3. Keep the skin dry

Description:
 1. Cleaning stoma skin R
 2. Removing the remained adhesives
 3. Soft liquid, moisturizing the skin
 Packing details: 3.5*4cm, 3Ply, 2Pieces

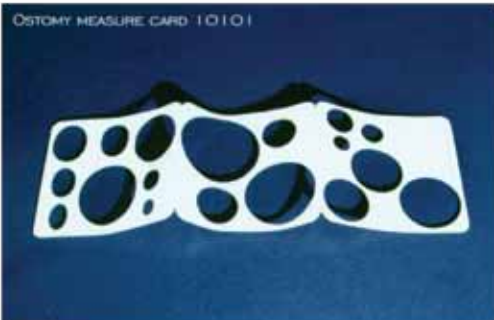

Description:
 1. Good viscosity, soft and friendly to skin and hypoallergenic.
 2. Soft and ductile, easy to be shaped.
 3. convenient

Description:
 1. Odor-free and effective.
 2. Convenient.
 Size (cm): Line 2.8cm

Description:
 1. Help to wash the ostion
 2. Convenient
 size (cm): 60cm

Description:
 Paper board and printing
 For measuring stoma's size,
 convenient for patients to cut the skin barrier
 Cut Size: 15-80mm, L*W:200x150mm
 Packing details: one piece per one carton

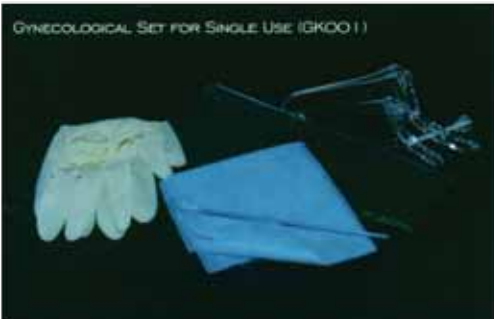

Description:
 Paste for Ostomy leakage
 Guar Gum, Isopropanol
 60G
 One bottle is in one Box

Description:
 Plastic Clip for Ostomy Bag open type
 Easy to use clip to control leakage

Description:
 Elastic Belt for Ostomy Bag
 Strengthen to make bag with body

 Type of connectors: Butterfly infusion port
 Size: 100ml, 250ml, 500ml, 1000ml, 3000ml

Description:
 Stoper and cap fitted with infusion bag

Description:

Operation same as common disposable Syringe. After use, the needle will be pulled back into barrel inside and locked to avoid needle sticks and the risk of infection will be eliminated.

After use, the pulled back syringe can't be assemble with needle again to meet complete destruction purpose

Spec: 1ml, 2ml, 3ml, 5ml, 10ml

Description:

Operation same as common disposable Syringe.

After use, the piston will be locked by itself, so that can avoid repeat use

Spec: 0.05ml, 0.1ml, 0.5ml, 1ml, 2- 3ml, 5ml

Description:

1. sterilized, Non-toxic, non-pyrogenic, single use only
2. High transparency of the barrel offers an exact control of the mixture and liquid flow
3. The black indelible scale permits an easy and exact reading
4. The special treatment by medical silicone guarantees a safe, regale and lubricative condition
5. Raw material: GAMA stable
6. Spec: 10ml, 30ml

Description:

1. Luer lock
 2. Sufficiently transparent barrel allows easy measurement.
 3. Graduated scale on the barrel is easy to read. graduation is printed by indelible ink.
 4. The plunger fits the inside of barrel very well to allow for free and smooth movement.
 5. Material for gasket natural latex/ synthetic rubber (latex free)
 6. Material for barrel and plunger. medical grade PP
 7. With or without needle
 8. Individual package: blister bag/ PE bag
 9. Available size: see the table below
- Spec: 1ml, 2ml, 3ml, 10ml, 20ml, 50ml

Description:

1. Luer lock
 2. Sufficiently transparent barrel allows easy measurement.
 3. Graduated scale on the barrel is easy to read. graduation is printed by indelible ink.
 4. The plunger fits the inside of barrel very well to allow for free and smooth movement.
 5. Material for gasket natural latex/ synthetic rubber (latex free)
 6. Material for barrel and plunger. medical grade PP
 7. With or without needle
 8. Individual package: blister bag/ PE bag
 9. Available size
- Spec: 1ml, 2ml, 5ml, 10ml, 20ml

Description:

1. Sterilized by EO gas. Non-toxic, non-pyrogenic, single use only.
2. Luer lock or luer slip.
3. Sufficiently transparent barrel allows easy measurement.
4. Graduated scale on the barrel is easy to read. Graduation is printed by indelible ink.
5. Material for barrel: medical grade PP (polypropylene)
6. Material for plunger: medical grade PP (polypropylene)
7. With or without needle
8. Individual package: blister bag/ PE bag
9. Spec: 3ml, 10ml, 20ml

Description:

1. Sterilized by EO gas. non-toxic. non-pyrogenic, single use only.
2. Sufficiently transparent barrel allows easy measurement of the volume contained in the syringe and detection of air bubble.
3. Graduated scale on the barrel is easy to read. Graduation is printed by indelible ink.
4. The plunger fits the inside of barrel very well to allow for free and smooth movement.
5. Material for barrel and plunger. medical grade PP (polypropylene).
6. Material for gasket: natural latex/ synthetic rubber (latex free).
7. The needle cannula is glued with the syringe tip, no dead space.
8. Ultra fine needle (29G, 30G)
9. Individual pack: Blister pack/Poly bag
10. Size: 0.5ml, 1ml

Description:

- Sterilized by EO gas.
- non-toxic. non-pyrogenic, single use only.
- Luer lock, three parts, without needle
- Sufficiently transparent barrel allows easy measurement of the volume contained in the syringe
- Accurate graduation printed by indelible ink is easy to read
- The plunger fits the inside of barrel extremely well, allowing free and smooth movement
- Korea R370Y for barrel and plunger
- Material of gasket isoprene rubber (latex free).
- Available size: 10ml
- Packing: in bulk

Disposable Hypodermic Needles

- With different length
 - sterile
 - Non-toxic, pyrogen free
